SUMMARY

I am a Full-stack developer specializing in website and Flutter mobile application development. My expertise in front-end and back-end technologies allows me to build seamless, efficient applications across multiple platforms. I am eager to discuss how my skills align with your company's needs.

WORK EXPERIENCE

Website Development, CKS Solutions September 2023 - Present

- Collaborated with other software developers on design, development, and testing of programs.
- Designed and implemented various web-based applications for clients.
- Integrated data from various back-end services and databases.
- Designed and developed using Agile Scrum methodology..

Flutter Development, CKS Solutions

- Designed and coded new software or modified existing software to add new features.
- Developed mobile applications using Flutter, ensuring seamless performance across different platforms.
- Collaborated with cross-functional teams to ensure high-quality application development.
- Conducted testing and debugging to optimize mobile applications.

Internship, Full-Stack Development, CKS Solutions June 2023 - August 2023

- Collaborated on design, development, and testing of web applications, integrating data from various back-end services to ensure seamless performance.
 - Designed and implemented new features using Agile Scrum methodology, enhancing functionality and improving user experience across platforms.
-

EDUCATION

Bachelor of Technology Jun 2018- July 2022

Bharath Institute of Higher Education and Research, Chennai,

- Bachelor of Technology in Computer Science and Engineering.
 - Final CGPA: 7.71
-

KEY SKILLS

Website Development

- HTML/CSS/Bootstrap 5.3.3
- Angular 17
- Asp.Net core
- SQL
- Performance Optimization
- Agile Methodologies

Flutter Development

- Dart Programming
 - Flutter Framework
 - UI/UX Design
 - API Integration
 - Swagger
-

CERTIFICATION

- Certified Entry-Level Python Programmer
 - Full Stack Developer Internship Certificate
 - Master Flutter Webinar Certificate
 - Databricks Certification
-

RELEVANT PROJECTS

Website Development: Weteams Project

Site URL : <https://weteams.ckssolutions.co.in/>

- The We Teams web application project is a Customer Resource Management (CRM)
- The purpose of the project is to build an application program to reduce the manual, work for managing the Tasks, Resources, Attendance, Employees. It tracks all the details about,
- The Employees, Time Entries, Offices, and also taking a part in maintaining the financial resources.

Technologies Used:

Angular 13, ADO. Net Framework C# ,SQL Server.

Roles and Responsibilities:

- Extensive usage of Bootstrap for layout as well as responsive design and SCSS for Responsive design.
- Developed Angular components such as controllers, Services, filters, models.
- Developed the user interface for back-office support and worked collaboratively in agile scrum team on the design and development of application.
- Fixing bugs or errors found in the application.
- Integrate data from backend services (.NET core) and databases (SQL)

Website Development: Inventory Management System Project

Site URL : Localhost

- The goal of inventory management is to understand stock levels and stock's location in warehouses.
- Inventory management software tracks the flow of products from supplier
- Through the production process to the customer. In the warehouse, inventory management

Technologies Used:

Angular 13, ASP.Net Entity Web Api Framework C#,SQL Server.

Roles and Responsibilities:

- Extensive usage of Bootstrap for layout as well as responsive design and SCSS for Responsive design.
- Developed Angular components such as controllers, Services, filters, models.
- Developed the user interface for back-office support and worked collaboratively in agile scrum team on the design and development of application.
- Fixing bugs or errors found in the application.
- Integrate data from backend services (.NET core) and databases (SQL)

RELEVANT PROJECTS

Website Development: CKS Site Project

Site URL: <https://weteams.ckssolutions.co.in/>

- Developed and designed an informational website (CKS) aimed at providing comprehensive and accessible information
- Implemented user-friendly navigation and interactive elements to enhance user engagement and ease of access to information.
- The goal was to create a valuable online resource that educates and empowers users, fostering a knowledgeable community interested

Technologies Used:

Angular 13, ASP.Net Entity Web Api Framework C#,SQL Server.

Roles and Responsibilities:

- Extensive usage of Bootstrap for layout as well as responsive design and SCSS for Responsive design.
- Developed Angular components such as controllers, Services, filters, models.
- Developed the user interface for back-office support and worked collaboratively in agile scrum team on the design and development of application.
- Fixing bugs or errors found in the application.
- Integrate data from backend services (.NET core) and databases (SQL)

Website Development: CareerIn Project

Site URL : <https://careerin.ckssolutions.co.in/>

- Developed and launched Careerin website, a platform dedicated to providing comprehensive career guidance and resources
- Implemented user-friendly design and interactive features to facilitate seamless navigation and enhance user engagement.
- Curated and published valuable content including career tips, and educational resources to assist users in achieving their professional goals.
- Aimed to create a robust online resource that empowers users with the knowledge and tools needed to succeed in their careers.

Technologies Used:

Angular 13, ASP.Net Entity Web Api Framework C#,SQL Server.

Roles and Responsibilities:

- Extensive usage of Bootstrap for layout as well as responsive design and SCSS for Responsive design.
- Developed Angular components such as controllers, Services, filters, models.
- Developed the user interface for back-office support and worked collaboratively in agile scrum team on the design and development of application.
- Fixing bugs or errors found in the application.
- Integrate data from backend services (.NET core) and databases (SQL)

RELEVANT PROJECTS

Flutter Development: Travel Expense Tracker Project

Apk Build file: <https://i.diawi.com/iTFULH>

- Developed a Travel Expense Tracker application using Flutter for the frontend and ASP.NET Entity Framework for the backend.
- Designed and implemented intuitive user interfaces and functionalities to efficiently track travel expenses, leveraging Flutter's cross-platform capabilities.
- Integrated ASP.NET Entity Framework to manage backend data operations, ensuring data integrity and scalability for the application.
- Aimed to streamline expense management for travelers by providing a reliable and user-friendly mobile solution.

Technologies Used:

Flutter, Swagger, ASP.Net Entity Web Api Framework C#,SQL Server.

Roles and Responsibilities:

- Developed a Travel Expense Tracker application using Flutter for the frontend and ASP.NET Entity Framework for the backend.
- Designed intuitive user interfaces and implemented functionalities to track travel expenses effectively, leveraging Flutter's cross-platform capabilities.
- Integrated ASP.NET Entity Framework to manage backend data operations, ensuring data integrity and scalability for the application.
- Focused on creating a practical solution to streamline expense management for travelers, emphasizing usability and functionality.
